Jan 01, 2012 I've tried a lot of chorus plug-ins Many of them were free, many of them weren't free, but this one is probably one of the best sounding chorus plug-ins I've ever tried.. DirectWave is one of the most complete VST samplers currently available The demos in this player are created using Varazdin Orchestral and don't come with DirectWave by default.. With Classic Chorus you get great washy sounds without getting too distorted along with a solid set of parameters to fool around with.
